Shoulda, woulda, Cuda.

Offshore model with swordfish-taming padding shown: \$57.49

Cuda, prolific manufacturer of quality [blades](#), [pliers](#), [sharpeners](#) and accessories, unveiled a lineup of [fishing gloves](#).

This new line of gloves comes in three functions: bait, offshore and wire wrapping. Each features Neoprene and Microfiber construction and a padded Kevlar palm that is cut resistant for comfort, safety and dexterity. They also include a reflective strip for visibility, a pull loop for easy removal, and a velcro closure for a secure fit. They are all water-repellent and are designed for the index finger and thumb to work on touch screens.

The bait gloves are ideal for bait cutting. The offshore gloves are perfect for inshore fishing, but feature extra padding for offshore fishing tasks. The wire-wrapping gloves feature extra kevlar between the thumb and index finger.
