Handle designed for optimal comfort and safety

**1. Sharp Objects**

Fillet like a veteran with **Cuda's new professional knife line.** The first pro series includes seven knives from 6 to 10 inches in length featuring USA CTS 40A titanium nonstick bonded stainless-steel blades. The knives are designed to cut through anything and are extremely durable. The handle is made of 47-layer cold-molded Micarta and fits comfortably in your hand. Each knife comes with a custom-molded hard sheath and is covered by Cuda's lifetime warranty. **\$49.99-\$79.99; cudabrand.com**

2

**2. Ice Cold**

**Huk** has redefined its essential neck gaiter with the new **NXTLVL I.C.E. gaiter**, featuring I.C.E. technology: interior materials that cause an endothermic reaction when met with moisture, resulting in a 10-plus-degree drop over a three-minute period. So the new gaiter protects you from the sun, and keeps you cool all day. This next evolution of the gaiter also offers superior breathability, stain release, and antimicrobial properties to eliminate odors. **\$24.99; hukgear.com**

3

**3. Sure-Footed**

Transition from a day on the water to a night out with **Finatic II** deck shoes from **Xtratuf**. They combine Xtratuf's signature chevron nonmarking slip-resistant outsole with a premium full leather upper to create a shoe that keeps you sure-footed on the boat and ready for whatever happens once you hit the dock. The pigskin-lined OrthoLite memory-foam insert offers additional comfort, and the air-mesh fabric allows your foot to breathe. Available in two colors, sizes 7-14. **\$84.99; xtratufboots.com**
